Notice Name CCO - 15:56 25/10/11 - Critical Contingency Status Update
Published 25/10/2011 15:57
Begin Date & Time 25/10/2011 15:55
End Date & Time 30/10/2011 23:59
Notice Period 5
Required Response Indicator Action Required

Detail 25/10/2011
All Bands (1-6) have been curtailed with immediate effect on the Northern, BOP, and Morrinsville lines. Only domestic load remains.
Depressurisation of the affected area of pipeline is also complete. Further specialists (geotech) are on route to the location, and will arrive on site around 6pm. For safety reasons a full excavation cannot occur until they have completed a detailed site evaluation. This could take until midday tomorrow.
Meanwhile an engineering team is working on a range of options to resolve the situation depending on the scenario they are faced with. The resources they are likely to require are being identified and resourced.
