Detail 03/03/2012  
Termination of Critical Contingency

This Notice is issued to notify you that the CCO has determined that the Critical Contingency has been terminated under Regulation 60 of the Gas Governance (Critical Contingency Management) Regulations 2008.

1. Time and date contingency terminated

23:30 03/03/12

2. Event that caused critical contingency

Pohokura production station tripped at 03:40 this morning. Pressure at the inlet to Rotowaro compressor station in the Maui pipeline declined to a level requiring the CCO to declare a critical contingency.

3. Areas of transmission system affected

All areas

4. Details of event resolution

Pohokura production station resumed flow at 17:00 and achieved full flow by 19:00. All demands curtailed during the event have now been restored and the system is now capable of supplying full demand levels.

Notes:

(a) All directions issued by the CCO pursuant to the termination of the Critical Contingency must be complied with.

(b) TSOs must issue notices regarding the termination of the Critical Contingency in accordance with Regulation 61.

(c) The communications described in the CCO Communication Plan and TSOs CCMPs are deactivated at the time and date that the critical contingency is terminated.

(d) The communication of this notice by email is recorded on the CCO computer system and the notice is considered received by this record. The date and time of this notice is that time stamped by the CCO computer system. It is not required to reply to or acknowledge this email notice. It is not required to reply to or acknowledge this email notice.

(e) This notice will be communicated by a truncated SMS message.

(f) This notice will be published on the CCO internet site in the public domain. Refer to <https://www.oatis.co.nz>

(g) The CCO will notify the TSOs by telephone of this notice.
