

Status Update Notice (CCO-060H)

Date:	24 May 2016
Time:	19:30pm
Notice Number:	CC-0023
Notice Type:	Status Update
Notice Issued To:	Stakeholders listed in Information Guide
Notice Copied To:	TSOs
Date and Time Critical Contingency Declared:	24 May 2016 at 18:30pm
Event that caused Critical Contingency:	Pohokura Production Station tripped due to a power outage. Maui pipeline linepack dropped rapidly and the critical contingency pressure threshold at Kapuni was subsequently breached.
CCO determination on Regional Critical Contingency Status:	Non-Regional
Areas of transmission system affected:	Maui Pipeline System
CCO actions being taken to stabilise the gas system:	Further to the Declaration Notice, other producers have responded and increased production levels. As a result, the CCO does not at this time need to issue a Curtailment Notice. The CCO will continue monitoring the system until it has stabilised.
Curtailment Directions issued by CCO:	No curtailment instructions have been given. Curtailment may not be required if the system continues to recover.
Details of Event resolution:	STOS have been able to restart Pohokura Production Station.
Estimated Time to repair underlying problem:	STOS anticipate achieving normal production levels by approximately 20:30pm

This notice is supplementary to the other notices issued by the CCO during a critical contingency.

This notice does not contain any directions or declarations and is published to provide more information and forecasts about the status of the critical contingency.

The information contained in Status Update Notices is based on the best information/knowledge available to the CCO at the time of publication and may vary over the duration of the event as the situation changes/develops.

The CCO will issue advice of this Status Update to the stakeholders listed in the CCO Information Guide and publish this notice in the public domain of the CCO web site at <http://www.cco.org.nz>
